In re: W254AP, Rushville, IN
BPFT-20110829AAN
Facility ID # 142214

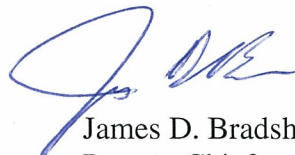

Dear Applicant:

This refers to the above-captioned FM translator application for W254AP, Rushville, Indiana.

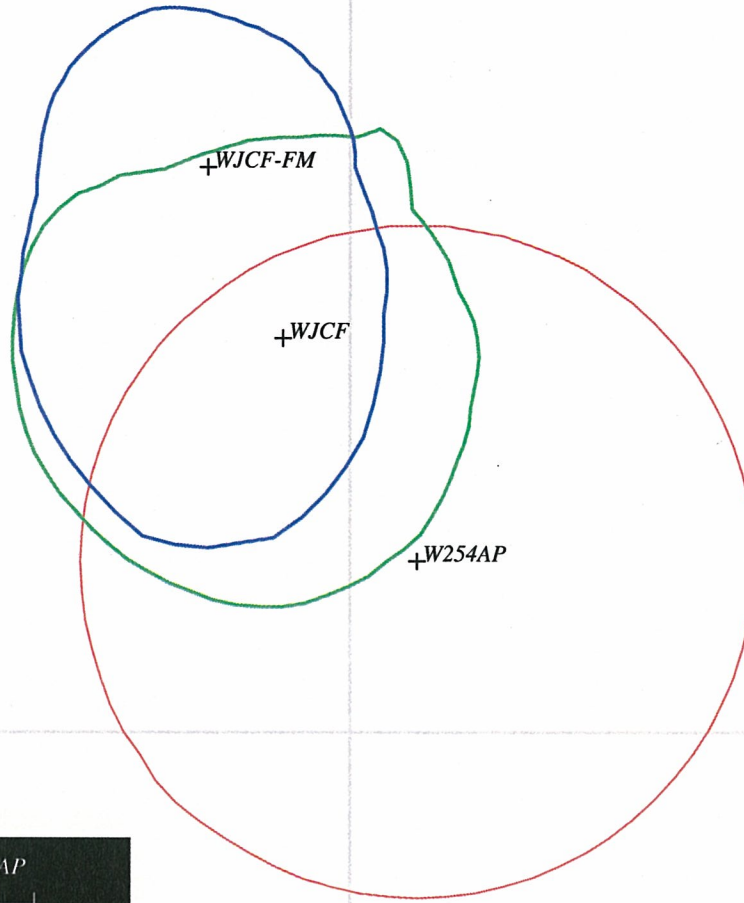

An engineering study of the application reveals that it is in violation of 47 C.F.R. § 74.1204(a) and (e) with respect to co-channel translator primary station WJCF(FM), Morristwon, Indiana. The predicted 40 dBu interference contour overlaps the protected 60 dBu contour of WJCF(FM), BLED-20000728AEF and BPED-20090107AIS. Section 74.1204(e) of the Commission's rules states § 74.1204(a) does "not apply to overlap between a proposed fill-in FM translator station and its primary station operating on a first, second or third adjacent channel, *provided* that such operation may not result in interference to the primary station within its principal community." The proposed facility is neither a "fill-in" translator to the primary nor is it proposing an appropriate adjacent frequency. Therefore, the application will be dismissed.

In light of the above, the application BPFT-20110829AAN filed by Indiana Community Radio Corporation is unacceptable for filing pursuant to 47 C.F.R. § 73.3566(a) and IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
Audio Division
Media Bureau
